¹ Urban, rural, and suburban are defined by counties as presented in the Indiana Public Health Priorities - Volume 1, 1994

² Because HIV cases are adjusted for reporting delay, some subtotals may vary by one case. This the result of rounding.

³ The cases categorized as the mode of exposure "Not Classified always are more numbers in more recent years. As these cases are investigated to get risk information, they are redistributed to the proper mode of exposure. Therefore, "Not Classified" cases are less numerous in earlier years.

¹ Urban, rural, and suburban are defined by counties as presented in the Indiana Public Health Priorities - Volume 1, 1994

²Because AIDS cases are adjusted for reporting delay, some subtotals may vary by one case. This the result of rounding.

³ The cases categorized as the mode of exposure "Not Classified always are more numbers in more recent years. As these cases are investigated to get risk information, they are redistributed to the proper mode of exposure.

¹ Urban, rural, and suburban are defined by counties as presented in the Indiana Public Health Priorities - Volume 1, 1994

² Because AIDS cases are adjusted for reporting delay, some subtotals may vary by one case. This the result of rounding.

³ The cases categorized as the mode of exposure "Not Classified always are more numbers in more recent years. As these cases are investigated to get risk information, they are redistributed to the proper mode of exposure.
